

NYLON PROTECTIVE SLEEVE FOR HIGH PRESSURE HOSES

Texsleeve is a continuous tubular sleeve made of polyamide fibers. Specially treated in order to withstand an abrasion resistance of over 200.000 cycles (according to ISO 6945). Texsleeve is the perfect anti diffusion sleeve able to contain pin hole occurrences at high pressure.

Standard colour:

Black - Other colours are available on request

Standard print:

TEXSLEEVE
Possibility of custom printing and screen-print in colours

Temperature range:

-40° C to +100°C (-40° F to +212° F)

UV Resistance certified according to EN13758-1

MSHA approval for mining applications n. IC207/01

Complies with Australian spec MDG-41

Complies with UN-EN 1501-1, EN 982, EN 3457

TEXSLEEVE is available in the following range:
